

## distributed audio

Imagine every room of your home filled with rich, warm, vibrant sounds – your sounds. Whether you want to listen to a favorite CD, enjoy a mix on your iPod, tune in to a local talk radio show or immerse yourself in the sounds of an afternoon game – you are surrounded with clarity and brilliance from every direction. Distributed Audio from AMXhome is the

easy-to-choose, easy-to-use solution that makes your acoustical dream a reality. And whether you want to listen to the same thing throughout the house, or something different in each room, source selection is made easily and volume control is at your beck and call. This is Distributed Audio from AMXhome. Enjoying the simple life is just a touch away.

Select the music you want to hear in each room and control volume from one central location or in each room with local room audio controls.

Mio R-4

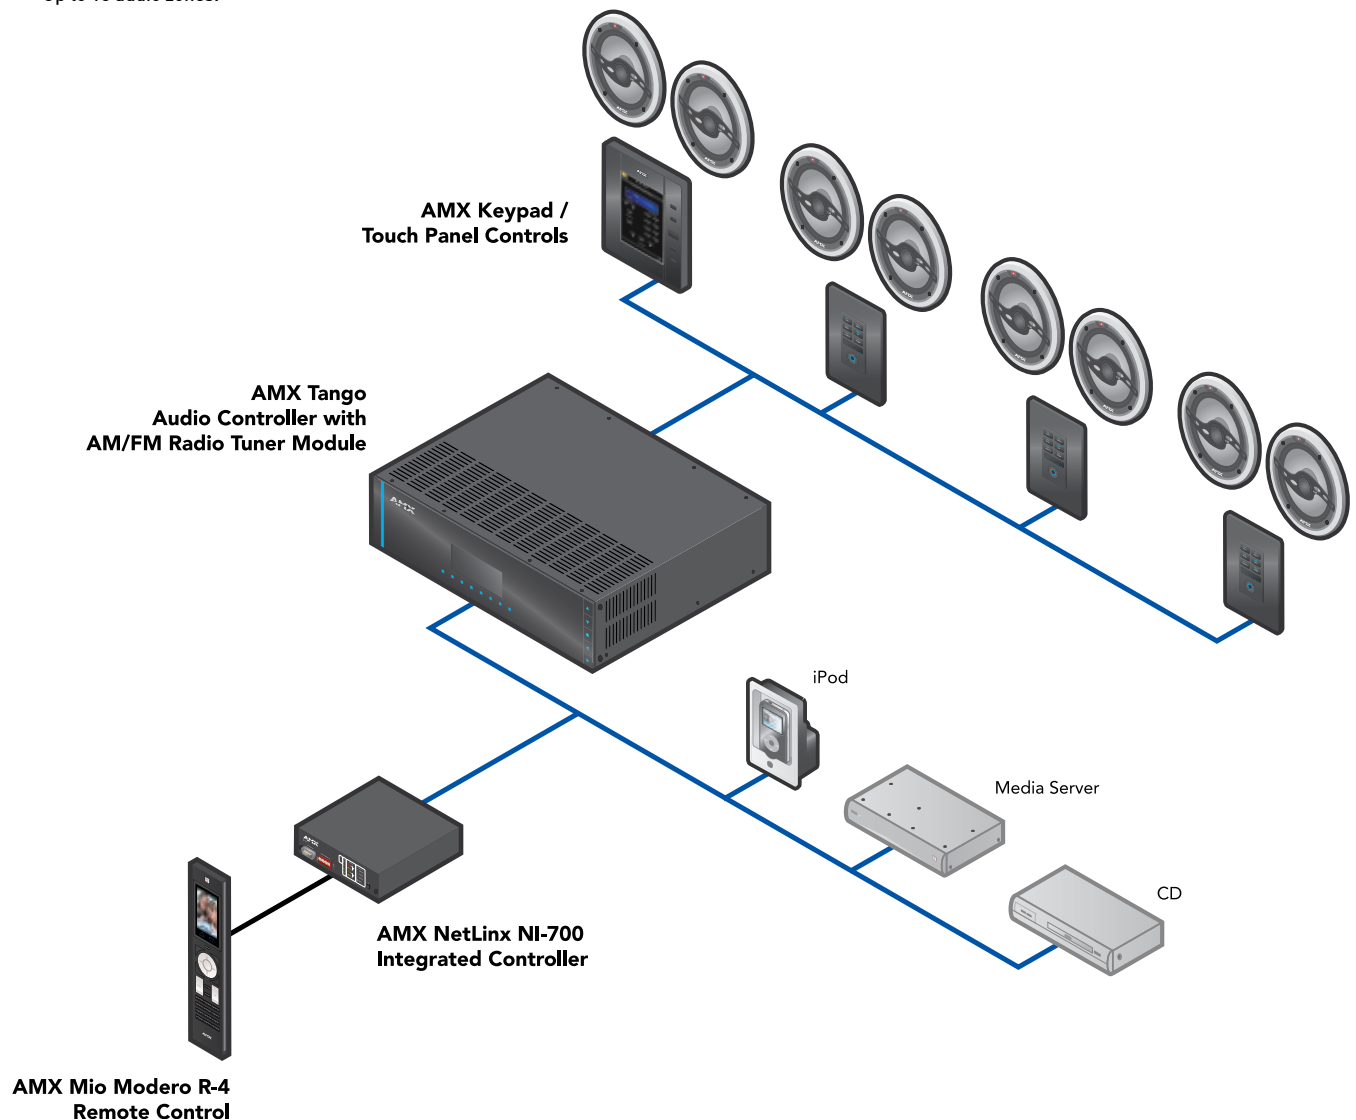

# distributed audio

Distributed Audio from AMXhome looks and works as beautifully as it sounds. From the cool blue glow of the Tango Audio Controller to the eye-catching elegance of the mirror-matched Metreau Keypads, your system complements your living space and your lifestyle. And just about any audio source you may want to listen to is supported – CD, Media

Server, iPod, Satellite Radio, AM/FM Radio and more. With AMXhome, everything is included so the only decision you have to make is what to listen to and where. Welcome to the luxury, convenience and simplicity you've only dreamed about. Welcome to AMXhome.
